

# Mackenzie Global Environmental All Cap Equity

## Investment philosophy

Managed in a value style, Mackenzie Global Environmental All Cap Equity strategy seeks to provide long-term capital appreciation by investing in equity securities that operate in the environmental economy and will benefit from the long-term trends of changing demographics, resource scarcity and environmental degradation.

The strategy maintains a portfolio of companies whose revenues are generated by selling environmentally superior products and services from the following sectors:

 <b>Clean energy</b>	 <b>Energy efficiency</b>	 <b>Clean technology</b>	 <b>Sustainable agriculture</b>	 <b>Water treatment</b>	 <b>Sustainable transportation</b>
<ul style="list-style-type: none"> <li>• Renewable utilities</li> <li>• Renewable equipment</li> <li>• Electric infrastructure</li> <li>• Energy storage equipment</li> <li>• Renewable fuels</li> </ul>	<ul style="list-style-type: none"> <li>• Building management and efficiency</li> <li>• Lighting</li> <li>• Engineering/Consulting</li> <li>• Power Management</li> <li>• Automation and drives</li> </ul>	<ul style="list-style-type: none"> <li>• Waste management and pollution controls</li> <li>• Software and logistics</li> <li>• Advanced materials</li> <li>• Metering and monitoring</li> <li>• Industrial efficiency</li> </ul>	<ul style="list-style-type: none"> <li>• Food processing/ logistics</li> <li>• Agricultural inputs</li> <li>• Sustainable food retail</li> <li>• Sustainable forestry</li> </ul>	<ul style="list-style-type: none"> <li>• Water utilities</li> <li>• Water equipment</li> </ul>	<ul style="list-style-type: none"> <li>• Transportation operators</li> <li>• Transportation equipment</li> </ul>

## Compliance statement

Mackenzie Investments claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. Mackenzie Investments has been independently verified for the periods January 1, 2008 through December 31, 2019. The verification report is available upon request. A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm’s policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. Verification does not provide assurance on the accuracy of any specific performance report.

## Composite description

The Global Environmental All Cap Equity Composite seeks to provide long-term capital appreciation by investing primarily in listed equity securities of issuers located anywhere in the world that operate in the environmental economy. The strategy seeks to achieve its objectives by identifying undervalued securities that will benefit from the long-term trends of changing demographics, resource scarcity, and environmental degradation. Portfolios in the composite will invest primarily in environmental sectors which include clean energy, energy efficiency, clean technology, water, sustainable agriculture and transportation. There is no limit on the market capitalization of securities within this composite. Prior to September 29, 2021, the composite name was Global Environmental Equity. The composite was created on January 1, 2021 and the inception date is February 1, 2008.

## Benchmark description

The benchmark is the MSCI AC (All Country) World Total Return Index, net of withholding taxes. The MSCI AC World Index is a free float adjusted, market capitalization weighted index that is designed to measure the equity market performance of developed and emerging markets. The index consists of 23 developed and 24 emerging market country indices.

## Reporting currency

Valuations and composite performance are reported in Euros. The composite includes Canadian dollar portfolios that have been converted to Euros.

## Internal dispersion

Internal dispersion is calculated using the asset-weighted standard deviation of annual gross returns of those portfolios that were included in the composite for the entire year. Internal dispersion is only calculated for those composites which have at least 6 accounts for the full year.

## Ex-post standard deviation

The 3-year annualized standard deviation measures the variability of the gross composite and benchmark returns over the preceding 36-month period.

## Fees

The maximum fee for the strategy is 1.50% per annum.

## Performance history

Performance prior to January 2021 occurred while the investment management team was affiliated with another firm. The investment management team has managed the composite since its inception, and the investment process has not changed. The historical performance has been linked to performance earned at Mackenzie Investments.

## List of composites and pooled funds

A list including composite descriptions, pooled fund descriptions for limited distribution pooled funds, and broad distribution funds is available upon request. See “Contact Information” below.

## Performance calculations

Gross of fee returns are calculated before management, operating and other fees but after all trading expenses and withholding taxes. Gross of fee performance for mutual fund accounts included in the composites are calculated by geometrically adding back the pro-rated monthly percentage of the total net Management fee expense ratio to the monthly net return. Gross composite performance is calculated by asset weighting the individual account returns using beginning of period market values. Net composite performance is calculated by reducing the gross composite performance by the maximum fee which may include investment management and administration fees.

## Valuation principles

Investments listed on a public securities exchange or traded on an over-the-counter market are valued at the closing price. Where no closing price is available, the last sale or close price is used. Unlisted or non-exchange traded investments, or investments where the last price is unavailable or investments for which market quotations are, in Mackenzie’s opinion, inaccurate, unreliable, or not reflective of all available material information, are valued at their fair value as determined by Mackenzie using appropriate and accepted industry valuation techniques including valuation models. The fair value determined using valuation models requires the use of inputs and assumptions based on observable market data including volatility and other applicable rates or prices. In limited circumstances, the fair value may be determined using valuation techniques that are not supported by observable market data.

Additional information regarding policies for valuing portfolios, calculating performance, and preparing GIPS® reports are available to prospective clients upon request. See “Contact Information” below.
